

ISCRAM ASIA PACIFIC 2022 WORKSHOP
@ NEW ZEALAND CONFERENCE HUB

Disruptive Technologies Supporting Situation Awareness in Emergency Management

- **Discuss cutting-edge technological research** on information and data, artificial intelligence, geospatial sciences, sensor technology, human-computer interaction, and others
- **Explore collaboration** between the research community and emergency sector professionals in **developing disruptive technologies** and information systems to **enhance response** to large-scale events.

8 NOVEMBER 2022

9:15 AM - 11:30 AM

AUCKLAND UNIVERSITY OF TECHNOLOGY

RSVP: <https://forms.gle/aZDmFRHWFmey9TXd9>

The workshop is FREE, but we have limited spaces. Please register.

Participants will have:

- Airfare support if outside Auckland in New Zealand
- Complimentary pass to other ISCRAM Asia Pacific AUT Hub Activities

ISCRAM (Information Systems Crisis Response and Management) is an international community that promotes research and the exchange of knowledge related to the design, use, and evaluation of information systems deployed for emergency and disaster mitigation, preparation, response, and recovery.
